Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over PCT Patent Application Publication Number WO 00/23952-A1 published 27 April 2000 in view of Patent Number US 6,481,620 B1 by Katou et al. The banknote processing apparatus disclosed by said '952 publication incorporates deposit compartment 10, unit 16-18, validation checking means 11 and process unit 12 that read on the Applicant's money-in module, counterfeit collection box, discrimination module and counterfeit processing module, respectively. Although said '952 fails to disclose a notification module the use of such customer notification devices is well known in the art. Said '620 patent teaches statement processing mechanism 102 that reads on the Applicant's

Art Unit: 3653

notification module. Accordingly, it would have been obvious to one of ordinary skill in the art at the time of the invention to incorporate the statement processing mechanism 102 of said '620 patent into the banknote processing apparatus of said '952 publication to provide an effective means of notifying a customer of the particulars of a particular transaction.

Regarding claims 10 and 11, said '620 patent teaches temporary storage box 400 that reads on the Applicant's temporary storage box.

Regarding claims 13 and 14, said '952 publication discloses packaging unit 18 that produces currency bundles which read on the Applicant's bundles.

Conclusion

The following prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Patent Number. US 6,598,726 B1 by Lundblad et al because of its detector means 11,

Patent Number US 6,422,458 B1 by Katou et al because of its temporary storage box 40, and

Patent Number 5,718,318 by Wachter because of its one-way store 16.
